DEILAB: LEGO Innovation - ALL NEW MATERIAL

Coursework is based on mechanical, artistic, design and robotics projects. Our unique programming explores the foundations of engineering in the modern day! DEILAB awakens creative problem-solving skills in people of all ages. We use “Toys as Tools to Teach” about Design, Engineering and Innovation concepts.

With head-to-head designing varying from buildings, bridges, battle robots and more; the act of play motivates a kind of mental activity that energizes creative thinking and innovation. Participants experience the thrill of leading and innovating in a competitive environment of the mind while enhancing analytical, problem-solving and collaboration skills.

**Wednesdays
3:30 - 4:30pm**

**Wednesdays: April 17, 24, May 1, 8, 15, 22, 29
Grades 1-5
\$245**
